Laffanour / Galerie Downtown, Paris

Laffanour / Galerie Downtown, Paris

Laffanour / Galerie Downtown, Paris, brings together exceptional works by Pierre Jeanneret and Le Corbusier, Charlotte Perriand and Jean Prouvé. The pieces, selected by François Laffanour, were originally realized for the Chandigarh project in India, which involved designing a new city the size of the capital as "an expression of faith in India's future." The result is a sumptuous selection of furnishings, objects, and interiors, as well as Le Corbusier's original sketches for the project. It is the perfect study of what great design can do, for the mind, body, and soul.
